Table 1

Summary of coefficients. Achievement is modelled as a function of Math Anxiety x Gender (female vs male). N = 100,000.

Coefficient	B	95% CI	Std. Err.	t	p-value
Intercept	59.39	[59.04, 59.75]	0.18	326.26	$p < .001$
Gender					
male	-1.02	[-1.50, -0.53]	0.25	-4.09	$p < .001$
Math Anxiety	-0.45	[-0.47, -0.44]	0.01	-63.08	$p < .001$
Gender x Math Anxiety					
male : math anxiety	0.10	[0.08, 0.12]	0.01	9.73	$p < .001$
<i>Sigma</i>	10.03				

Note. For Gender, “female” is the baseline level.

```
